Education

The University of Winnipeg
Bachelor of Applied Computer Science

Winnipeg, MB
Jan 2022 – Present

Projects

ConvoCube | React.js, ReactNative, JavaScript, TailwindCSS, Express.js, WebSockets, Node.js, ShadcnUI, React Native Paper, MongoDB [\[Link\]](#)

- Developed a real-time Chatting app across Android, iOS, and web platforms using React.js and ReactNative, integrated user Authentication using JWT with OTP verification.
- Real-time communication is powered by WebSockets for instant messaging.
- Utilized MongoDB to efficiently save and display user data within the application, ensuring seamless data management and accessibility.

GetMeACoffee | Next.js, JavaScript, TailwindCSS, MongoDB, NextAuth [\[Link\]](#)

- Developed a full-stack fundraiser web application using Next.js, integrating GitHub, Google, and Facebook OAuth for user data authentication with NextAuth, and Stripe for payment processing.
- Utilized MongoDB to efficiently save and display user data within the application, ensuring seamless data management and accessibility.

NoteSky | React, JavaScript, BootStrap, MongoDB, Express.js, Node.js [\[Link\]](#)

- Developed a full-stack cloud-based note-taking app using the MERN stack, creating APIs with Express.js to save and fetch user data, and implementing bcryptjs and JWT for secure user authentication.
- Utilized MongoDB Atlas for global data accessibility, ensuring seamless and reliable user data management.

Experiences

Skip the Dishes

Dec 2023 - Present

- Utilized Skip's technology and internal tools to resolve escalated courier inquiries and ensure seamless multi-channel communication on the JET platform.
- Facilitated live chat support, providing real-time assistance to couriers, ensuring timely responses and solutions.
- Consistently met and exceeded personal performance KPIs, enhancing overall service quality for couriers and stakeholders.

Technical Skills

Languages: Java, Python, SQL, JavaScript, TypeScript

Frontend: ReactJs, NextJs, Redux, React Native

Backend: Python, Node.js, Express.js, JavaScript

Database: MongoDB, PostgreSQL

DevOps: Git, Unix, Nginx
